## **Alphalogix™ Announces AS/400 Database Support in Tasica Forms Director 3.0**

**Huntington Beach, CA, August 27, 2007** – Alphalogix™, a long-time leader in electronic forms and workflow technology, announced today Tasica Forms Director 3.0's support of the AS/400 allowing users to seamlessly integrate stored data into effective workflow processes.

Tasica Forms Director allows users to design workflows to include electronic forms with digital signatures, multiple language options, unlimited variable decisions, pre-population of data and easy to edit flexibility. Concurrent workflows can also be designed with variables making logical decisions based off of the data and information submitted through the electronic form. By supporting the AS/400, customers can extend the value of their AS/400 environment with the power of workflow and business process automation.

Created with the enterprise customer in mind, Tasica Forms Director integrates seamlessly with existing infrastructure for directories, databases and portals, so there is no limit in choice in software, operating system or computing platform. For companies with an AS/400, this compatibility is a critical factor in maximizing their investment in eforms and workflow solutions because it requires no additional coding or costly consultant visits.

According to Bob McCandless, CEO of Alphalogix, "Forms Director opens up electronic workflow creation to everyone in the organization whether they are the IT Director or an HR Manager. Because of it's interoperability it's truly the complete workflow solution."

Tasica Forms Director currently supports all major relational databases such as DB2, Microsoft SQL, Oracle, AS400/DB2. For additional information about Tasica Forms Director or other products and services provided by Alphalogix, please contact Victoria Sauer at 714-901-1456 ext. 209.

**About Alphalogix** - Alphalogix is an expert in portal technology, electronic forms and workflow solution and content management expertise. As a two time Lotus Award winner for "Best Worldwide Portal Solution", Alphalogix has worked with customers such as Twentieth Century Fox, Golden State Foods, and Starbucks creating collaborative portals that efficiently connect people and applications together. Alphalogix is currently revolutionizing workflow technology with its latest release of Tasica Forms Director, a business process automation solution for rapid workflow application creation.
