

## Tasica Dynamic Reports (Version 3.4)

### Unify Your Data With Data Centric Reporting

Many businesses maintain their IT infrastructure with a wide variety of data, stored in countless amounts of databases, connected to different applications. In order to monitor data from these disparate sources without using tools for each application, organizations need Tasica Dynamic Reports to unify their infrastructure.

Tasica Dynamic Reports is a custom reporting application that pulls data from multiple data sources into customized reports allowing management personnel to see how everyday business processes are running in real time. As a highly robust, data centric reporting solution, users can conceptualize and design reports from any data source including business logic based, electronic workflow data, and information from any relational database.

#### Real Time Reporting

- Pull data from multiple data sources into real time reports
- Drill down filtering capabilities
- View reports on the web or enterprise class portal environment
- Run data queries to find filtered information in real-time
- Export report data to Microsoft Excel or print from Tasica Dynamic Reports
- Receive a birds-eye-view of your business processes at a moments notice

#### Usability Made Simple

- An easy-to-use, no code graphical interface allows users to customize or modify their reports
- Simplified integration provides a point-and-click interface for easy access to data repositories
- Permission based rules allow certain members of your organization rights to view customized reports
- Extend the value of the Tasica Workflow Solutions and IBM Lotus Forms with Tasica Dynamic Reports to monitor electronic workflow data along side data from any other relational data source.

#### TASICA DYNAMIC REPORT PLATFORMS

- Windows Server
- IBM AIX
- Red Hat Enterprise Linux
- Suse Linux Enterprise Server

#### TASICA DYNAMIC REPORT BROWSERS

- Internet Explorer
- Firefox
- Safari

#### DATABASE INTEGRATION

JDBC relational databases including:

- Microsoft SQL Server
- IBM Db2
- Oracle
- MySQL
- and many more

#### DIRECTORY INTEGRATION

- Microsoft Active Directory
- IBM Lotus Domino
- IBM Directory Server
- LDAP

#### ENTERPRISE PORTAL INTEGRATION

- IBM WebSphere Portal
- Oracle WebLogic Portal
- SAP Portal
- Liferay Portal CE

#### IBM SOFTWARE INTEGRATION

- IBM WebSphere Portal
