

# TASICA™ INDUSTRY SOLUTIONS

## HEALTHCARE

### Introducing Tasica Workflow Healthcare Applications

Tasica Workflow Industry Solutions by Alphalogix provide flexible electronic form and workflow application solutions suited for healthcare providers and payers. These applications make it simple to create and manage critical information in a business-process solution with real-time metrics and ad-hoc reporting for added business insight. With Tasica Workflow, healthcare providers and payers reduce operational costs including paper form management and human data entry. Tasica Workflow Industry Solutions help place the focus on patient health while improving productivity, efficiency and communication between patients, doctors and staff.

### Healthcare Workflow Applications

Alphalogix provides a variety of healthcare-specific applications that integrate seamlessly with most current hospital information systems. All healthcare applications are fully HIPPA compliant.
