

# TASICA™ INDUSTRY SOLUTIONS

## HUMAN RESOURCES

### Introducing Tasica Workflow Human Resources Applications

Tasica Workflow Industry Solutions by Alphalogix provide flexible electronic form and workflow application solutions suited for a variety of industry and general business processes including human resources departments or specialists. As a no code, human-centric workflow solution, Tasica Workflow allows businesses to create, manage and monitor HR workflow applications in real-time. Businesses are able to professionally communicate with their employees and potential employees with easy to use, web based applications. With Tasica Workflow applications, businesses can focus on improving the management of people, not paper.

### Human Resource Workflow Applications

Alphalogix provides a variety of human resources workflow applications that integrate seamlessly with many existing Human Resource Management Systems as well as corporate directories, databases, web services and portal environments.
