

TASICA™ INDUSTRYSOLUTIONS

INSURANCE

Introducing Tasica Workflow Insurance Applications

In order to successfully provide the highest level of service, reduce operational cost and stay competitive, insurance agencies need to ensure that they have an effective and easy-to-operate channel of communication between their agents and their customers. Tasica Workflow solutions help deliver the correct information in real-time for improved communication and reduction in operational costs. Robust workflow and reporting applications can instantly enhance customer satisfaction and eliminate inefficient processes.

Insurance-Specific Workflow Applications

Alphalogix provides a variety of insurance-specific applications that integrate seamlessly with most current infrastructures including ACORD eForms+, databases, directories, and portal environments.
