## TASICA SOLUTION BENEFITS

### EASE OF USE

- Create web-based, self-service applications for enterprise portal environments.
- Apply simple or complex workflow rules to electronic forms.
- Point-and-click wizard driven workflow design.
- No formal IT training or custom coding to create simple or complex workflow.

### FLEXIBILITY

- Supports XML open standard electronic form formats.
- Route electronic forms to and from content management systems.
- Concurrently run multiple workflow tasks.

### INTEGRATION

- Integrates seamlessly with existing infrastructures.
- Write information from electronic forms to databases.
- Read information from a database to an electronic form.
- Delegate action to a colleague via directory integration.

### FEATURES

- Out-of-the-box workflow monitoring and statistics.
- Integration with dashboard for real-time business insight.
- Manage and monitor on-going action items from an enterprise portal.
- Integration with Tasica Dynamic Reports to create real-time reports of workflow data.
- Real-time action item alerts via e-mail or smart mobile device.

### PRODUCTIVITY

- Reduce operational costs and corporate carbon footprint.
- Improve productivity with reduced manual labor, lost action items and forms processing time.

### TASICA FORMS DIRECTOR / DYNAMIC REPORTS DESIGNER PLATFORMS

- Windows 2008 Server
